EDUCATION

Columbia University - The Fu Foundation School of Engineering and Applied Science - New York, NY | *B.S. Computer Science, Expected 2030*

- Selected coursework: Calculus I, Introductory Mechanics & Thermodynamics, Principles of Economics, University Writing, The Art of Engineering.

Rwanda Coding Academy - Rwanda | *Advanced Level Software Programming & Embedded Systems* | 2023–2026

- Intensive training in software development, programming, embedded systems, databases, and technology-driven problem solving.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern - SACOLA | *Summer 2025*

- Developed and supported full-stack software features across frontend and backend components in a professional engineering environment.
- Worked with application logic, APIs, databases, authentication, and debugging while collaborating with other developers.

Backend Developer - New Health Intelligence Center | *Sep 2025 – Aug 2026*

- Contributed to technology projects focused on health data and digital systems, gaining experience working on software intended to support healthcare workflows.
- Worked across backend services, databases, APIs, and application components while collaborating on real-world technology solutions.

DevOps Engineer - RCA Management Information System (RCA MIS) | *Nov 2024 – May 2026*

- Supported the deployment and infrastructure of a centralized school management platform used by students, teachers, and staff to manage academic and administrative operations.
- Worked on system security, scalability, reliability, and performance, supporting services handling student records, courses, grades, and financial information.

LEADERSHIP & ACTIVITIES

Minister of Sports, Culture & Entertainment - Rwanda Coding Academy Student Council | 2025–2026

- Represented students in sports, cultural, and entertainment activities and helped coordinate events and student engagement initiatives.
- Worked with student leaders to organize activities, communicate with students, and support a positive school community.

Vice Captain & Team Organizer - Rwanda Coding Academy Basketball Team | *High School*

- Supported the captain in guiding the team when no official coach was present, helping coordinate practices, communication, and game-day responsibilities.
- Managed organizational responsibilities and helped balance team needs on and off the court.

Soccer Player & Basketball Player - School Athletics | *High School*

- Participated in competitive school sports, developing teamwork, discipline, communication, and time-management skills.

Peer Mentor - Brainiacs, Rwanda Coding Academy | 2024–2026

- Mentored new students entering the academy, helping them adapt to the academic environment and build confidence in technical learning.
- Explained programming concepts and shared study strategies while supporting a collaborative peer-learning environment

Student Researcher - Rwanda Coding Academy | 2024–2026

- Conducted three independent research projects under the supervision of Dr. Awet Fesseha, exploring applications of AI, engineering, and data science to real-world challenges.
- Developed research questions, reviewed literature, analyzed data and findings, and presented results through structured research papers.
- Strengthened skills in scientific research, technical writing, data analysis, critical thinking, and research communication.

SELECTED PROJECTS

SurVie - Health Intelligence Platform - Team Project | 2025–2026

- Designed a health platform concept connecting hospital data into an ecosystem that can provide users with a more unified view of their medical information.
- Explored personalized AI capabilities and biometric-based emergency identification to support faster access to relevant health information.

Stratiq - AI & Data Science for Financial Decision-Making - Personal | 2025–2026

- Developed a project focused on using data science and AI to support financial prediction, analysis, and decision-making for companies.

OpenLab Virtual STEM Laboratory - Team Project | 2025–2026

- Developing a virtual laboratory platform designed to expand access to STEM experimentation for rural communities and schools with limited laboratory resources.
- Combines software and interactive learning concepts to make practical STEM experiences more accessible.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, PHP, Kotlin, Swift, SQL, R, HTML/CSS

Web Development: React, Next.js, Vue.js, Node.js, Express.js, FastAPI, Spring Boot, Laravel, REST APIs, WebSockets, Tailwind CSS, Bootstrap

Mobile Development: React Native, Flutter, Kotlin, Swift, SwiftUI, Android, iOS, Expo

AI/ML & Data Science: TensorFlow, PyTorch, Keras, OpenCV, ONNX Runtime, ArcFace, MediaPipe, Pandas, NumPy, Data Analysis, Statistical Analysis, Data Visualization, Data Pipelines, OpenAI API

Data & BI: Tableau, Data Visualization, Data Analytics, Statistical Computing, SQL, Data Cleaning, Exploratory Data Analysis

Databases: PostgreSQL, MySQL, MariaDB, MongoDB, Database Design, Data Modeling, JSON/JSONB

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Jenkins, CI/CD, Linux/Kali Linux, Figma, VS Code

Cybersecurity: Nmap, Wireshark, Burp Suite, Metasploit, Masscan, Recon-ng, PicoCTF

Embedded & IoT: Arduino, ESP32, LoRa/RFM95, Sensors, Robotics, Embedded Systems, Computer Vision

Research skills: Research Methodology, Literature Review, Data Collection, Quantitative Data Analysis, Statistical Analysis, Computational Research, Critical Thinking, Scientific Writing, Data Interpretation, Research Presentation

ADDITIONAL INFORMATION

Languages: English, Kinyarwanda, French

Non technical skills: Leadership & Team Coordination, Communication, Teamwork & Collaboration, Problem Solving, Project Management, Mentorship, Organization & Time Management, Adaptability, Initiative, Presentation
